Front Kitchen Park Model

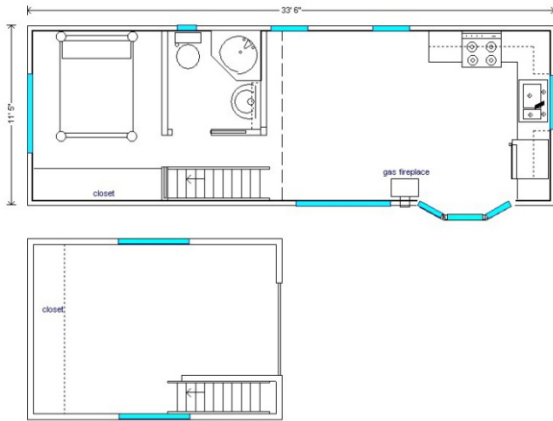

If you are looking for a park model cabin with a large kitchen space, perhaps a front kitchen design is right for you! This park model cabin is great for those who love to cook and offers the most counter space of all the designs we offer. Included in your purchase is a full sized 30" gas or electric range, full sized refrigerator, and a microwave above the range that is vented to the outside. Not only does it offer an abundance of storage and counter top space, it also allows for a full sized 24" dishwasher, without robbing a large percentage of the under counter storage space. The front design also allows for the addition of a pantry, always a welcome addition. Another added benefit to the front kitchen design is the living room space is not broken up by a counter as in some of the other models we offer.

Co-design the window configuration in the kitchen that is ideal for you, and make this park model cabin your dream home.

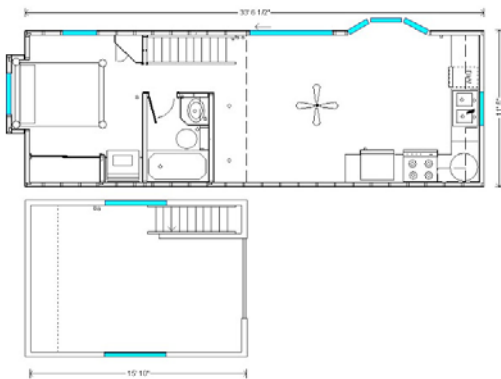

Remember, there are pros and cons for all model configurations, so be sure to peruse all the floor plans RPC offers and compare, mix and match. This front kitchen design can be applied to both lofted and non-loft configurations, so let Rich design a cabin for you! Examples of this design are: the Watson, Calgary and the Floyd.
